Investment Manager's Report

Legal Structure

Abbey Capital Multi-Manager Fund Limited (the "Fund") was incorporated in Bermuda on October 4, 2006 as an open-ended investment fund with variable capital and limited liability.

The Fund has created one Share Class; namely the USD Share Class which is subdivided into a number of Sub-classes. There are four Sub-classes namely the USD A Share Class, USD B Share Class, USD C Share Class and USD D Share Class. The Fund offers investors monthly dealing and the NAV for the USD A Share Class is listed on the Bermuda Stock Exchange. The Directors have the power to issue further Share Classes in different currencies in the future.

Share Class in Issue	Launch Date	NAV per share as of June 30, 2017
USD A Share Class	January 2, 2007	\$121.16
USD B Share Class	August 3, 2009	\$104.79
USD C Share Class	October 1, 2010	\$84.39
USD D Share Class	January 3, 2011	\$91.58

The Fund is a feeder fund to the ACL Alternative Fund as it invests substantially all of its assets in the ACL Alternative Fund. The ACL Alternative Fund is a segregated account of ACL Alternative Fund SAC Limited. ACL Alternative Fund SAC Limited is a segregated accounts company incorporated as an open-ended investment company with limited liability under the laws of Bermuda.

Investment Objective and Strategy

The investment objective of the Fund is to seek long-term capital appreciation for its shareholders within a rigorous risk management framework. The Fund aims to deliver its Investment Objective by investing in a range of trading strategies through a direct investment in the ACL Alternative Fund (the memorandum for this fund is available on request). The Investment Manager of the Fund is also the Investment Manager of ACL Alternative Fund and is responsible for choosing the Trading Advisors for that fund.

The ACL Alternative Fund allocated to 22 Trading Funds as at June 30, 2017, each Trading Fund being a separate and distinct fund established and maintained by ACL Alternative Fund SAC Limited. Through its shareholdings in the Trading Funds, the ACL Alternative Fund operates as a multi-advisor fund. The Trading Advisors of the Trading Funds are given a power of attorney to trade on behalf of the respective Trading Fund through a managed account in the Trading Fund's name held with one of the Trading Fund's principal brokers.

Diversification is achieved at both the Trading Fund trading style and market sector level. The ACL Alternative Fund, through its allocation of assets to the Trading Funds, invests in a range of trading styles, including Long-term Trendfollowing ("Trendfollowing"), Short-term Systematic ("Short-term"), Value, Global Macro and specialist FX strategies. Market exposure is broadly diversified with positions in global currency, financial and commodity markets. The Trading Advisors for the Trading Funds are selected on the basis of a variety of quantitative and qualitative criteria, including:

- long-term positive returns on capital invested
- favorable risk-adjusted performance measures
- favorable correlation of a Trading Advisor's strategy with the strategies of other Trading Advisors in light of the ACL Alternative Fund's investment objective and;
- proven track record and risk management capability.

Investment Manager's Report (continued)**Investment Objective and Strategy (continued)**

Attention is also paid to the correlation between each Trading Advisor's returns and the returns on equities. Ideally Trading Advisors that have displayed a tendency to have a negative correlation with equities when equities are declining are preferred. This has resulted in the ACL Alternative Fund's low long-term correlation with equity markets.

Fund Performance to date

Abbey Capital Multi-Manager Fund Limited USD A Share Class ("ACMMF USD A") returned a loss of -9.72% in H1 2017. ACMMF USD A commenced trading in January 2007 and invests solely in the ACL Alternative Fund USD A Share Class, a segregated account of ACL Alternative Fund SAC Limited. The ACL Alternative Program (USD A Share Class) commenced in 1 December 2000 and was launched as a fund on 3 January 2002. The ACL Alternative Fund USD A Share Class returned -8.96% in H1 2017. Since inception in December 2000, the ACL Alternative Fund USD A Share Class has returned cumulatively +219.05%, providing an annualised return of +7.24%⁽¹⁾.

All trading styles were negative, with Trendfollowing and Short-term being the primary drivers of losses. Value, Global Macro and FX managers also incurred losses on a smaller scale. By market sector, the largest losses were seen in major currencies with trading in energy and bonds also resulting in losses. Losses in grains, precious metals, and interest rates were further contributors to the negative performance of the Fund. Partially-offsetting gains were seen in equities, meats, base metals and softs.

The outlook for economic policy in the US was a key driver of markets early in the year. The possibility of fiscal stimulus and financial sector reforms had driven equities in the aftermath of the US presidential election and this theme continued to influence markets. As the year progressed, optimism around the new administration's ability to enact its policy agenda ebbed, with the lack of policy-specific detail at times providing concern. At the same time, evidence of global deflation was an important support for risk assets. Improved business sentiment and rising inflation data in the eurozone signalled that the region was entering a sustained period of recovery, while upbeat Chinese inflation and trade data also provided investors with reasons to be optimistic. Positive economic data in Australia and New Zealand and signs of improvement in emerging-market countries contributed to the picture of a broad-based recovery of the global economy. Although US economic data was somewhat less impressive, labour markets continued to show strength and the US Federal Reserve (the "Fed") portrayed confidence that any lull in US data was temporary. Global equities benefited from the environment of low inflationary pressures combined with improving global economic conditions, with the MSCI World Index touching all-time highs during the year.

Politics and geopolitical developments also drove markets at times. In early April, the decision by the US to launch a missile strike on Syria surprised investors and weighed on risk appetite amid concerns of a more activist US foreign policy under President Trump. Such concerns escalated after North Korea conducted ballistic missile tests. Domestically in the US, divisions between the Republicans and Democrats appeared to worsen following a string of controversies faced by the Trump administration. Trump's firing of the FBI Director and a special investigation into collusion between the Trump presidential campaign and Russia were both major flashpoints, while the inability to push through healthcare legislation also generated some concern. Although expectations for fiscal stimulus were pushed out amid the political tensions,

(1) Return figures shown are net of fees and include interest. (Pro forma interest from December 2000 to April 2001 actual interest received thereafter).

Investment Manager's Report (continued)**Fund Performance to date (continued)**

US equities continued to push higher as investors looked to upbeat earnings and an improving global economic outlook. An easing of political concerns in France also lifted risk sentiment, as Emmanuel Macron's victory provided a significant boost for risk appetite as the threat of an immediate French exit from the EU was removed. In the UK, however, uncertainty increased toward the end of H1, as the Conservative Party lost its majority in parliament after Prime Minister May called for a snap election. The GBP initially suffered as a result, but persistent USD weakness ensured that GBP/USD finished higher over the six months.

Central bank policy expectations became more of a focus as the year progressed, as investors began to speculate on whether the pickup in global economic data may prompt tighter monetary policy. In the US, the Fed stuck to its plan of gradual rate increases, with a +25bps hike coming in March and again in June 2017, but 10-year US Treasury yields finished the period lower as the Fed left its rate forecasts for 2017 and 2018 relatively unchanged. Having oscillated in a range, German 10-year yields rose sharply in late June as an apparent shift in tone from European Central Bank ("ECB") President Draghi swayed markets. For much of the period Draghi had highlighted the deflationary pressures in the eurozone however in June he commented that reflationary forces were replacing deflationary forces and that the recovery was broadening and strengthening. German 10-year yields closed the period +26bps higher, while hawkish rhetoric from Bank of England officials in June also supported a pickup in UK 10-year yields. Similar shifts in tone were seen from central bankers in Canada and New Zealand, and the narrower yield spread between US Treasuries and other developed market bonds weighed heavily on the USD over the period; EUR/USD rose +8.61%, GBP/USD rose +5.41% and USD/JPY closed -3.96% lower.

Commodities were relatively choppy in H1, with a number of markets enduring reversals. Crude oil traded in a broad range, caught between rising US production and optimism over an extension to OPEC and Russian production cuts, but ended sharply lower as excess supply concerns became the dominant driver. Precious metals benefited from USD weakness particularly in Q1 before correcting in June as developed market bond yields jumped. Base metals were mixed with copper and aluminium rising, but nickel declining amid supply glut worries. Supply disruptions in Chile and US fiscal stimulus hopes were supportive to copper in January and February but reduced expectations for US fiscal expenditure saw prices pull back in March and April; copper still finished the period up +7.25%. Agricultural commodities also experienced some significant moves. Cattle prices advanced as strong demand in cash markets and lower US cattle weights lifted the market, while sugar experienced a sustained decline on rising Brazilian supplies and signs of lower global demand. Cocoa sold off sharply for most of H1 amid persistent oversupply concerns from Ivory Coast, while soybeans also declined for much of the year before recovering slightly at the end of the period as the US Department of Agriculture ("USDA") reported smaller-than-expected stockpiles. Wheat finished the period up +17.48%, after a spike in June, as USDA data showed a fall in US plantings.

In H1 2017, the ACMMF USD A underperformed both the SG CTA index, which returned -3.45%, and the BTOP 50 index, which fell -4.77%⁽²⁾. Since inception in 2007, the ACMMF USD A has delivered total cumulative returns of +21.16%, versus +114.00% for the S&P 500 Total Return Index, +29.58% for the SG CTA Index and +18.70% for the Barclay BTOP 50 Index over the same time frame⁽³⁾.

(2) The above is shown for illustrative purposes only. None of the funds managed by Abbey Capital Limited are benchmarked against any index.

(3) Abbey Capital Multi Manager Fund Limited ("ACMMF") USD A Share Class commenced trading in January 2007 and invests solely in the ACL Alternative Fund USD A Share Class. All returns are net of fees and include interest. The above data is shown for illustrative purposes. The ACMMF is not benchmarked against any of the indices referenced. None of the funds managed by Abbey Capital Limited are benchmarked against any index. Please note that due to different fee structures within the ACMMF share classes, different share classes will have different returns. Some ACMMF share classes may have generated a lower return than the ACMMF USD A Share Class. Past results are not indicative of future results.

Investment Manager's Report (continued)**Fund Performance to date (continued)**

At the portfolio level, one Trendfollowing trading advisor was added to the ACL Alternative Fund portfolio in H1 2017, while one Short-term trading advisor was removed. Strategy allocations were broadly stable and we maintained our philosophy of holding a core allocation to Trendfollowing at approximately 55% of portfolio risk. We continued to allocate at 21% annualised volatility to managers.

Abbey Capital Limited – Investment Manager

Abbey Capital Limited ("Abbey Capital") entered its 17th year of track record in 2017 and we continue to invest in our IT infrastructure and proprietary risk systems and develop our business.

While we cannot control when, or where, profitable trends in markets will emerge, we remain focused on the aspects of the business that we can control: enhancing our investment process, maintaining our risk control, investing in our teams and infrastructure, and delivering top quality client service.

Notes to the Financial Statements

1. The Fund and its activities

Abbey Capital Multi Manager Fund Limited (the “Fund”) was incorporated on October 4, 2006 under the laws of Bermuda as an open-ended investment fund with variable capital and limited liability. The Fund has created one Share Class, namely the USD Share Class, which is divided into a number of sub-classes. The sub-classes are the USD A Share Class, USD B Share Class, the USD C Share Class and the USD D Share Class. All sub-classes offer investors monthly dealing. The Directors have the power to issue further Share Classes in different currencies in the future. The Fund is a feeder fund to the ACL Alternative Fund (the “ACL Alternative Fund”) as it invests substantially all of its assets into the ACL Alternative Fund. The ACL Alternative Fund is a segregated account of ACL Alternative Fund SAC Limited, a segregated accounts company incorporated as an open-ended investment company with limited liability under the laws of Bermuda. The NAV for the Fund’s USD A Share Class is listed on the Bermuda Stock Exchange. As at June 30, 2017 the Fund owns 15.09% of the ACL Alternative Fund.

The interim unaudited Financial Statements of the ACL Alternative Fund, including the Condensed Schedule of Investments, are attached to these interim unaudited Financial Statements and should be read in conjunction with the Fund’s interim unaudited Financial Statements.

The investment objective of the Fund is to seek long-term capital appreciation for its Shareholders within a rigorous risk management framework. The Fund aims to achieve this objective through its direct investment in the ACL Alternative Fund.

2. Significant accounting policies

These interim unaudited financial statements are presented using US Dollar (USD or US\$) as the functional currency and are prepared in conformity with accounting principles generally accepted in the United States of America (“US GAAP”).

The Fund is considered an Investment Company under US GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 946, Financial Services – Investment Companies (“ASC 946”). The significant policies adopted by the Fund are as follows;

Estimates and assumptions

The preparation of Financial Statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts and disclosures in the Financial Statements and accompanying notes. Actual amounts could differ from these estimates.

Investment income and expenses

Investment income and expenses are recognized in the Statement of Operations on an accruals basis.

Valuation of investments

The Fund records its investment in the ACL Alternative Fund at fair value. Fair value represents the price listed on the Irish Stock Exchange as at close of business on the relevant valuation day. The valuation of investments held by the ACL Alternative Fund is discussed in the notes to the ACL Alternative Fund interim unaudited Financial Statements which are attached to these interim unaudited Financial Statements.

Notes to the Financial Statements (continued)**2. Significant accounting policies (continued)****Foreign currency**

Other assets and liabilities denominated in foreign currencies are translated into USD amounts at the date of valuation. Income and expense items denominated in foreign currencies are translated into USD amounts on the respective dates of such transactions.

Redemptions payable

In accordance with FASB ASC Subtopic 480-10, Distinguishing Liabilities from Equity, a request for redemption of shares by an investor is considered a mandatory redeemable financial investment and shall be classified as a liability. Accordingly, requests for redemptions amounting to US\$6,564,303 which were effective for July 3, 2017 have been reclassified to redemptions payable on the Statement of Assets and Liabilities. The Fund has sufficient liquid assets available to ensure full payment of these redemption amounts.

3. Fair value measurements

The Fund's financial assets and liabilities carried at fair value have been classified for disclosure purposes, based on a hierarchy defined by FASB ASC 820, Fair Value Measurement.

The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3).

The three levels of the fair value hierarchy under ASC 820 are described below:

- Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access;
- Level 2 – Valuations based on inputs, other than quoted prices included in Level 1, that are observable either directly or indirectly; and
- Level 3 – Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

As required by ASC 820, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Notes to the Financial Statements (continued)
3. Fair value measurements (continued)

The below table shows information about the Fund's assets and liabilities measured at fair value as of June 30, 2017. All values shown are stated in USD.

	Level 1	Level 2	Level 3	Balance as at June 30, 2017
Assets				
Investment in the ACL Alternative Fund	328,279,131	-	-	328,279,131
Total	328,279,131	-	-	328,279,131

There were no transfers between any of the levels of the fair value hierarchy during the period January 1, 2017 to June 30, 2017. In addition there were no Level 3 Assets or Liabilities held by the Fund as at June 30, 2017 or at any time during the period then ended.

4. Fees and Expenses
Registrar and Transfer Agent, Administrator and Secretarial Services

The Fund pays US\$1,000 per month to the Administrator for the calculation of the Net Asset Value. These fees accrue daily and are paid monthly in arrears. The Fund pays US\$3,333 per month to the Registrar and Transfer Agent.

The Fund pays the Corporate Secretary and Bermuda Registrar an annual fee of US\$7,500 for corporate administration services.

The Fund is responsible for out of pocket expenses incurred by the Administrator, the Registrar and Transfer Agent, the Corporate Secretary and Bermuda Registrar for the benefit of the Fund. As a shareholder of ACL Alternative Fund, the Fund is required to pay its pro-rata share of the various fees and expenses of ACL Alternative Fund including brokerage commissions, administrative expenses, audit, legal, etc.

Fund Distributors

The Fund Distributors may receive a placement fee of up to 2% on all sales of the Shares. Each subscriber is informed of the placement fee attributable to such subscriber's Shares prior to committing to acquiring such Shares. Placement fees are paid in addition to the subscription amount. In addition, the Fund may pay the Fund Distributors an ongoing Distribution Fee equal to 2% of the average month-end Net Asset Value of the Fund for USD A Share Class and the USD C Share Class, accrued and payable monthly in arrears. Distribution fees for the period ending June 30, 2017 were US\$3,089,027 of which US\$470,015 were payable by the Fund for the period ending June 30, 2017. There are no Distribution Fees in the USD B Share Class or USD D Share Class.

Notes to the Financial Statements (continued)**4. Fees and Expenses (continued)****Investment Manager's Fee**

There are no investment management fees or incentive fees at the Fund level, but as a Shareholder of ACL Alternative Fund, the Fund will pay its pro-rata share of the management and incentive fees arising from the Fund's investment in the ACL Alternative Fund. Refer to the interim unaudited Financial Statements of the ACL Alternative Fund for further information on fees and expenses arising at the ACL Alternative Fund level. The Investment Manager will not receive any additional fees for acting as investment manager to the Fund or ACL Alternative Fund.

Depository fees

In accordance with the obligations under the Alternative Investment Fund Managers Directive, ("AIFMD"), the Investment Manager and the Directors of the Fund appointed a depository, BNP Paribas Securities Services, Dublin Branch (the "Depository"), to provide the depository services of cash monitoring, safe-keeping and oversight. The Depository is responsible for overseeing the calculation of the value of the Shares of the Fund and ensuring that the value of the Shares of the Fund is calculated in accordance with the Fund's Private Placement Memorandum, the Company's Bye Laws, and Article 19 of AIFMD and is responsible for reporting any breach to the Central Bank of Ireland. There are no Depository fees at the Fund level, but as a Shareholder of ACL Alternative Fund, the Fund will pay its pro-rata share of the Depository fees arising from the Fund's investment in the ACL Alternative Fund.

5. Taxation

At the present time, no income, profit or capital gains taxes are levied in Bermuda and, accordingly, no provision for such taxes has been recorded by the Fund.

The Fund has applied for, and obtained from, the Minister of Finance of Bermuda under the Exempted Undertakings Tax Protection Act 1966 an assurance that, in the event of there being enacted in Bermuda any legislation imposing tax computed on profits or income, or computed on any capital assets, gains or appreciation of any tax or nature of estate duty or inheritance tax, such tax shall not until March 31, 2035 be applicable to the Fund or to any persons not ordinarily resident in Bermuda and holding such Shares, debentures or other obligations of the Fund.

As an exempted mutual fund company, the Fund is liable to pay in Bermuda an annual government registration fee, at a current rate of US\$1,995 per annum, based upon the Fund's authorized share capital.

6. Share Capital

The capital of the Fund is divided into 100 Founder Shares and such number of classes of Shares as the Directors may from time to time determine with the rights and restrictions contained in the Bye-laws as outlined in the Placement Memorandum.

(a) Voting Rights: On a show of hands every Shareholder who is present in person or by proxy shall have one vote and every Founder Shareholder who is present, in person or by proxy, shall have one vote in respect of all of the Founder Shares. On a poll, every Shareholder present in person or by proxy shall be entitled to one vote in respect of each share held by him, and every Founder Shareholder who is present in person or by proxy, shall be entitled to one vote in respect of all of the Founder Shares.

Notes to the Financial Statements (continued)
6. Share Capital (continued)

(b) Dividends: Shareholders shall be entitled to such dividends as the Directors may from time to time declare. The Founder Shareholders shall not be entitled to any dividends in respect of such Founder Shares.

(c) Redemption: Shares may be redeemed by Shareholders on any Dealing Day in accordance with the Bye-laws.

(d) Winding Up: If the Directors decide that it is in the best interests of Shareholders to wind up the Fund, the Secretary shall forthwith at the Directors' request, convene a special general meeting of the Fund to consider a proposal to appoint a liquidator to wind up the Fund. The liquidator, on appointment, shall firstly apply the assets of the Fund in satisfaction of creditors' claims as he deems appropriate. The assets of the Fund shall then be distributed amongst the Shareholders. The assets available for distribution amongst the Shareholders shall be applied as per the procedure outlined in the Bye-laws.

Transactions in Shares for the period ending June 30, 2017 were as follows:

USD A Share Class	No. of Shares	Total US\$
Balance at December 31, 2016	2,236,230	337,714,349

8. Financial Instruments

The main risks arising from the Fund's financial instruments are as follows:

Investment in ACL Alternative Fund

The Fund is subject to the risks associated with the ACL Alternative Fund's investments and may also be adversely impacted by the activities of other shareholders in the ACL Alternative Fund. The risks arising from the ACL Alternative Fund's investments are set out in the notes to the ACL Alternative Fund's interim unaudited Financial Statements.

Notes to the Financial Statements (continued)**8. Financial Instruments (continued)****Market risk**

Market risk represents the potential loss that can be caused by a change in the market value of the financial instruments. The Fund's exposure to market risk results from its direct investment in the ACL Alternative Fund and is therefore indirectly determined by a number of factors including interest rates, foreign currency exchange and market volatility arising from the ACL Alternative Fund's investments in the Trading Funds. Investments by the ACL Alternative Fund through the Trading Funds may be made in markets located in countries which are exposed to the risks of political change or years of political uncertainty which could adversely affect the market value of the investments held by the ACL Alternative Fund.

The ACL Alternative Fund, through its investments into the Trading Funds, may invest in securities or derivatives which are unlisted or for which there is no active market.

For example, the Trading Funds may invest in derivatives with direct or indirect exposure to emerging markets and such investments may be subject to increased political risk or adverse currency movements compared to securities traded in more developed markets. In addition, the Trading Funds may acquire investments which are only traded over-the-counter. Accurately valuing and realizing such investments, or closing out positions in such investments at appropriate prices, may not always be possible.

Operational Risk

Pursuant to Investment Manager's Risk Management Policy, risks throughout the Investment Manager are identified, measured, assessed and monitored in the Risk Register. This system identifies factors that could cause risk, including operational risk, measures to reduce risk and any required solutions. It is reviewed on an ongoing basis by the respective business units and the Risk Management Unit. Reviews are completed by staff in consultation with the Risk Management Unit. The Risk Register is reviewed and approved annually by the Board of Directors of the Investment Manager.

Leverage

Under AIFMD, the Investment Manager is required to express the level which the Fund's leverage will not exceed, as a ratio between the Fund's total exposure and its Net Asset Value. AIFMD prescribes two methodologies for calculating overall exposure of a fund: the "gross methodology" and the "commitment methodology". These methodologies are briefly summarised below but are set out in full detail in AIFMD.

The commitment methodology takes account of the hedging and netting arrangements employed by a fund at any given time (purchased and sold derivative positions will be netted where both relate strictly to the same underlying asset). By contrast, the gross methodology does not take account of the netting or hedging arrangements employed by a fund.

Based on the methodologies for calculating global exposure outlined above, the Fund's maximum expected level of leverage is one time the Net Asset Value of the Fund using the Gross method. The Fund's maximum expected level of leverage is also one time the Net Asset Value of the Fund using the Commitment method.

Liquidity risk

In order to ensure that cash is available for the Fund to meet redemption requests, the Investment Manager has established and maintains risk management policies and systems which are designed to ensure that the Fund maintains a level of liquidity appropriate to its underlying obligations. The liquidity of the Fund is subject to the risks associated with the

Notes to the Financial Statements (continued)

8. Financial Instruments (continued)

Liquidity Risk (continued)

ACL Alternative Fund's investments and may also be adversely impacted by the activities of other shareholders in the ACL Alternative Fund. The liquidity risks arising from the ACL Alternative Fund's investments and the management of these risks by the Investment Manager are set out in the notes to the ACL Alternative Fund's interim unaudited Financial Statements.

9. Gains and losses from financial instruments

The following table details the gains and losses from financial assets and liabilities:

	For the period ended June 30, 2017
	US\$
Realized gains on Investments	1,952,587
Total gain on investments	1,952,587
Net change in unrealized loss on investments	(35,989,976)
Total loss on investments	(35,989,976)

Gains and losses presented above exclude the Fund's interest income and interest expense.

10. Related party disclosures

The Directors of the Fund are entitled to remuneration as agreed by the Directors and shall be deemed to accrue from day to day. Total Directors Fees paid will be no greater than US\$5,000 per annum. Mr. Carney does not receive a Director's fee. All other related party transactions have been fully disclosed in the interim unaudited Financial Statements, including investment in affiliated funds.

11. Cash and cash equivalents

Amounts held with BNP Paribas Securities Services, Dublin Branch as at June 30, 2017 amounted to US\$1,360,807. BNP Paribas Securities Services, Dublin Branch is rated by the following credit agencies: S&P A-1, Moody P-1 and Fitch F1.

12. Accounting for uncertainty in income taxes

Accounting Standards Codification ("ASC") 740-10 "*Accounting for Uncertainty in Income Taxes – an interpretation of ASC 740*" clarifies the accounting for uncertainty in income taxes recognized in the Fund's Financial Statements in conformity with ASC 740 "*Accounting for Income Taxes*". ASC 740-10 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position or expected position to be taken on a tax return. Given the Fund's domicile, the investment objective of the Fund and the strategy, the Directors of the Fund have determined there are no uncertain tax positions. In addition, the Fund is not subject to any tax examinations by the tax authorities in its country of domicile or taxing authorities in other jurisdictions.

Investment Manager's Report

Legal Structure

The ACL Alternative Fund (the "Fund") is a segregated account of ACL Alternative Fund SAC Limited (the "Company"). The ACL Alternative Program (USD Share Class A) commenced in December 2000 and was incorporated as an open-ended investment company in Bermuda on January 4, 2002. The Company commenced operating as a Segregated Accounts Company on May 18, 2009 following its restructure under the Segregated Account Companies Act 2000 of Bermuda, as amended (the "Act").

The Company has created five Share Classes, namely the USD Share Class, the GBP Hedged Share Class, the Euro Hedged Share Class, the CHF Hedged Share Class and the JPY Hedged Share Class, each of which is subdivided into a number of sub-classes of which sixteen are currently in issue (see table below for details). The Directors have the power to issue further Share Classes in different currencies in the future.

Share Classes in Issue	Launch Date	NAV per share as of June 30, 2017
USD Share Class A	January 31, 2002	\$266.87
USD Share Class B	July 3, 2006	\$156.25
USD Share Class C	January 2, 2009	\$93.03
USD Share Class D	January 15, 2014	\$117.93
USD Share Class E	April 1, 2014	\$113.16
Euro Hedged Share Class A	July 1, 2004	EUR188.04
Euro Hedged Share Class B	July 1, 2009	EUR105.25
Euro Hedged Share Class C	January 29, 2010	EUR98.85
GBP Hedged Share Class A	June 1, 2010	£106.21
GBP Hedged Share Class B	January 30, 2006	£172.97
GBP Hedged Share Class C	February 4, 2011	£89.06
CHF Hedged Share Class A	April 15, 2011	CHF81.35
CHF Hedged Share Class B	March 1, 2010	CHF101.25
CHF Hedged Share Class C	October 15, 2010	CHF84.22
JPY Hedged Share Class B	January 21, 2011	¥9,235
JPY Hedged Share Class D	August 31, 2010	¥9,541

The Fund has five feeder funds. Abbey Global, LP and ACL Global Fund (a sub-fund of ACL Fund SICAV Plc) invest in excess of 40% of their assets in the Fund. Abbey Capital Multi-Manager Fund Limited, Abbey Capital ACL Alternative Fund (a sub-fund of ACL Fund SICAV Plc), and Abbey Capital Daily Futures Fund Limited, invest the majority of their assets into the Fund.

Investment Objective and Strategy

The Fund allocated to 22 trading funds (the "Trading Funds") as at June 30, 2017, each Trading Fund being a separate and distinct fund established and maintained by the Company. Through its shareholdings in the Trading Funds, the Fund operates as a multi-manager fund. The trading advisors of the Trading Funds (the "Trading Advisors") are given a power of attorney to trade on behalf of a Trading Fund through a managed account in the Trading Fund's name held with one of the Trading Fund's principal brokers.

Diversification is achieved at both the Trading Fund trading style and market sector level. The Fund, through its allocation of assets to the Trading Funds, invests in a range of trading styles, including Long-term Trendfollowing ("Trendfollowing"), Short-term Systematic ("Short-term"), Value, Global Macro and specialist FX strategies. Market exposure is broadly diversified with positions in global currency, financial and commodity markets.

ACL Alternative Fund

June 30, 2017

Investment Manager's Report (continued)

Investment Objective and Strategy (continued)

The Trading Advisors for the Trading Funds are selected on the basis of a variety of quantitative and qualitative criteria, including:

- long-term positive returns on capital invested,
- favorable risk-adjusted performance measures,
- favorable inter-Trading Advisor correlations to provide diversification benefits between Trading Advisors, and
- proven track record and risk management capability.

Attention is also paid to the correlation between each Trading Advisor's returns and the returns on equities. Ideally Trading Advisors that have displayed a tendency to have a negative correlation with equities when equities are declining are preferred. This has resulted in the Fund's low long-term correlation with equity markets.

Fund Performance to date

The Fund's USD Share Class A returned -8.96% in H1 2017. Since inception in December 2000 the Fund's USD Share Class A has returned cumulatively +219.05%, providing an annualised return of +7.24%⁽¹⁾.

All trading styles were negative, with Trendfollowing and Short-term being the primary drivers of losses. Value, Global Macro and FX managers also incurred losses on a smaller scale. By market sector, the largest losses were seen in major currencies with trading in energy and bonds also resulting in losses. Losses in grains, precious metals, and interest rates were further contributors to the negative performance of the Fund. Partially-offsetting gains were seen in equities, meats, base metals and softs.

The outlook for economic policy in the US was a key driver of markets early in the year. The possibility of fiscal stimulus and financial sector reforms had driven equities in the aftermath of the US presidential election and this theme continued to influence markets. As the year progressed, optimism around the new administration's ability to enact its policy agenda ebbed, with the lack of policy-specific detail at times providing concern. At the same time, evidence of global reflation was an important support for risk assets. Improved business sentiment and rising inflation data in the eurozone signalled that the region was entering a sustained period of recovery, while upbeat Chinese inflation and trade data also provided investors with reasons to be optimistic. Positive economic data in Australia and New Zealand and signs of improvement in emerging-market countries contributed to the picture of a broad-based recovery of the global economy. Although US economic data was somewhat less impressive, labour markets continued to show strength and the US Federal Reserve (the "Fed") portrayed confidence that any lull in US data was temporary. Global equities benefited from the environment of low inflationary pressures combined with improving global economic conditions, with the MSCI World Index touching all-time highs during the year.

Politics and geopolitical developments also drove markets at times. In early April, the decision by the US to launch a missile strike on Syria surprised investors and weighed on risk appetite amid concerns of a more activist US foreign policy under President Trump. Such concerns escalated after North Korea conducted ballistic missile tests.

(1) The ACL Alternative Fund is a segregated account of ACL Alternative Fund SAC Limited. The ACL Alternative program (USD Share Class A) commenced in December 2000 and was incorporated as a fund in January 2002. Return figures shown are net of fees and include interest (pro forma interest is included from December 2000 – April 2001, actual interest thereafter). Please note that due to different fee structures within the ACL Alternative Fund, different share classes will have different returns. Some ACL Alternative Fund share classes may have generated a lower return than the ACL Alternative Fund USD Share Class A. Past results are not indicative of future results.

Investment Manager's Report (continued)**Fund Performance to date (continued)**

Domestically in the US, divisions between the Republicans and Democrats appeared to worsen following a string of controversies faced by the Trump administration. Trump's firing of the FBI Director and a special investigation into collusion between the Trump presidential campaign and Russia were both major flashpoints, while the inability to push through healthcare legislation also generated some concern. Although expectations for fiscal stimulus were pushed out amid the political tensions, US equities continued to push higher as investors looked to upbeat earnings and an improving global economic outlook. An easing of political concerns in France also lifted risk sentiment, as Emmanuel Macron's victory provided a significant boost for risk appetite as the threat of an immediate French exit from the EU was removed. In the UK, however, uncertainty increased toward the end of H1, as the Conservative Party lost its majority in parliament after Prime Minister May called for a snap election. The GBP initially suffered as a result, but persistent USD weakness ensured that GBP/USD finished higher over the six months.

Central bank policy expectations became more of a focus as the year progressed, as investors began to speculate on whether the pickup in global economic data may prompt tighter monetary policy. In the US, the Fed stuck to its plan of gradual rate increases, with a +25bps hike coming in March and again in June 2017, but 10-year US Treasury yields finished the period lower as the Fed left its rate forecasts for 2017 and 2018 relatively unchanged. Having oscillated in a range, German 10-year yields rose sharply in late June as an apparent shift in tone from European Central Bank ("ECB") President Draghi swayed markets. For much of the period Draghi had highlighted the deflationary pressures in the eurozone however in June he commented that reflationary forces were replacing deflationary forces and that the recovery was broadening and strengthening. German 10-year yields closed the period +26bps higher, while hawkish rhetoric from Bank of England officials in June also supported a pickup in UK 10-year yields. Similar shifts in tone were seen from central bankers in Canada and New Zealand, and the narrower yield spread between US Treasuries and other developed market bonds weighed heavily on the USD over the period; EUR/USD rose +8.61%, GBP/USD rose +5.41% and USD/JPY closed -3.96% lower.

Commodities were relatively choppy in H1, with a number of markets enduring reversals. Crude oil traded in a broad range, caught between rising US production and optimism over an extension to OPEC and Russian production cuts, but ended sharply lower as excess supply concerns became the dominant driver. Precious metals benefited from USD weakness particularly in Q1 before correcting in June as developed market bond yields jumped. Base metals were mixed with copper and aluminium rising, but nickel declining amid supply glut worries. Supply disruptions in Chile and US fiscal stimulus hopes were supportive to copper in January and February but reduced expectations for US fiscal expenditure saw prices pull back in March and April; copper still finished the period up +7.25%. Agricultural commodities also experienced some significant moves. Cattle prices advanced as strong demand in cash markets and lower US cattle weights lifted the market, while sugar experienced a sustained decline on rising Brazilian supplies and signs of lower global demand. Cocoa sold off sharply for most of H1 amid persistent oversupply concerns from Ivory Coast, while soybeans also declined for much of the year before recovering slightly at the end of the period as the US Department of Agriculture ("USDA") reported smaller-than-expected stockpiles. Wheat finished the period up +17.48%, after a spike in June, as USDA data showed a fall in US plantings.

ACL Alternative Fund

A segregated account of ACL Alternative Fund SAC Limited

June 30, 2017

Investment Manager's Report (continued)

Fund Performance to date (continued)

The Fund underperformed both the SG CTA index, which returned -3.45%, and the BTOP 50 index, which declined -4.77%⁽²⁾. The Fund's USD Share Class A has delivered total cumulative returns of +219.05% since inception, versus +155.87% for the S&P 500 Total Return Index and +109.20% for the SG CTA Index over the same time frame⁽³⁾.

At the portfolio level, one Trendfollowing trading advisor was added to the Fund in H1 2017, while one Short-term trading advisor was removed. Strategy allocations were broadly stable and we maintained our philosophy of holding a core allocation to Trendfollowing at approximately 55% of portfolio risk. We continued to allocate at 21% annualised volatility to managers.

Abbey Capital Limited – Investment Manager

Abbey Capital Limited ("Abbey Capital") entered its 17 year track record in 2017 and we continue to invest in our IT infrastructure, proprietary risk systems and develop our business.

While we cannot control when, or where, profitable trends in markets will emerge, we remain focused on the aspects of the business that we can control: enhancing our investment process, maintaining our risk control, investing in our teams and infrastructure, and delivering top quality client service.

ACL Alternative Fund

A segregated account of ACL Alternative Fund SAC Limited

June 30, 2017

Notes to the Financial Statements

1. The Fund and its activities

The ACL Alternative Fund (the “Fund”) is a segregated account of ACL Alternative Fund SAC Limited (the “Company”). The Company is an open-ended investment fund, located in Bermuda with variable capital and limited liability. The Company was incorporated on January 4, 2002.

The Company commenced operating as a Segregated Accounts Company on May 18, 2009 following its restructure under the Segregated Account Companies Act 2000 of Bermuda, as amended (the “Act”). As a result of this restructure, the Company created segregated accounts, including the Fund and the Trading Funds. As segregated accounts, the assets and liabilities of each segregated account are segregated, which means the assets of each segregated account are available to meet the liabilities to creditors in respect of that segregated account only and will be protected from creditors of the Company or the Company’s other segregated accounts⁽⁷⁾.

Investors may invest in the Fund directly or via one of the feeder funds, namely Abbey Capital Multi-Manager Fund Limited, Abbey Capital ACL Alternative Fund, Abbey Capital Daily Futures Fund Limited, ACL Global Fund or Abbey Global, LP. The investment objective of the Fund is to achieve long term capital appreciation for its Shareholders.

As at June 30, 2017 the Fund allocates in excess of 75% of its assets to 22 Trading Funds, each Trading Fund being a segregated account of the Company. Appointed Trading Advisors are given a power of attorney to trade on behalf of a Trading Fund through a managed account in the Trading Fund’s name held with one of the Trading Fund’s principal brokers. Through its allocation of assets to the Trading Funds, the Fund operates as a multi-advisor fund. As at June 30, 2017, the ACL Alternative Fund allocated to 22 underlying managers.

The Fund has created five Share Classes, a USD Share Class, a GBP Hedged Share Class, a Euro Hedged Share Class, a CHF Hedged Share Class and a Yen Hedged Share Class each of which is subdivided into a number of sub-classes of which sixteen are currently in issue; a USD Share Class A, a USD Share Class B, a USD Share Class C, a USD Share Class D, a USD Share Class E, a Euro Hedged Share Class A, a Euro Hedged Share Class B, a Euro Hedged Share Class C, a GBP Hedged Share Class A, a GBP Hedged Share Class B, a GBP Hedged Share Class C, a CHF Hedged Share Class A, a CHF Hedged Share Class B, a CHF Hedged Share Class C, a JPY Hedged Share Class B and a JPY Hedged Share Class D. The USD Share Class A, Euro Hedged Share Class A and GBP Hedged Share Class A are listed on the Irish Stock Exchange. The functional currency is the United States Dollar (USD).

2. Significant accounting policies

These interim unaudited financial statements are presented using the United States Dollar (USD) as the functional currency and are prepared in conformity with accounting principles generally accepted in the United States of America (“US GAAP”).

⁽⁷⁾ The provisions of the Act have not yet been tested by a court.

Notes to the Financial Statements (continued)**2. Significant accounting policies (continued)**

The Fund is considered an Investment Company under US GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 946, Financial Services – Investment Companies ("ASC 946"). The significant policies adopted by the Fund are as follows;

Estimates and assumptions

The preparation of Financial Statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts and disclosures in the Financial Statements and accompanying notes. Actual amounts could differ from these estimates.

Basis of preparation and consolidation

These interim unaudited Financial Statements are prepared under the historical cost convention, as modified by the revaluation of investments to fair value. The Fund has a 100% interest in each of its 22 Trading Funds. Accordingly, these interim unaudited financial statements consolidate the Trading Funds. Intercompany transactions, balances and gains and losses on transactions between the Fund and the Trading Funds are eliminated in the consolidation process.

Recognition of income

Interest income is accounted for on an accrual basis and recognized in the Statement of Operations.

Valuation of investments

The value of any security traded on a stock exchange is valued at the last reported trade quoted on such exchange or, if not available, at the mean between the exchange quoted bid and ask prices at the close of business. This equates to fair value as it represents the amount at which the security could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The fair value of a liability is the amount at which that liability could be incurred or settled in a current transaction between willing parties, that is, other than in a forced or liquidation sale. Derivative instruments dealt on a market will be valued at the settlement price as of the date of valuation for such instruments on such markets as this equates to fair value.

In the event of no ready market value or counterparty quote being available, or if such valuation is not representative of the asset's fair market value, the Fund's appointed administrator (the "Administrator") is entitled to use other generally recognized valuation principles in order to reach a proper valuation of that specific asset. These valuation techniques may involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.

Realized gains and losses on investments are determined on a first-in first-out basis, except for futures where opening trades undertaken on the same day are netted prior to the application of first-in, first-out.

Cash and cash equivalents

Cash, including cash denominated in foreign currencies, represents cash deposits held at financial institutions. Cash equivalents include short-term highly liquid investments of sufficient credit quality that are readily convertible to known amounts of cash and have original investments of three months or less. Cash equivalents are carried at cost, plus accrued interest, which approximates fair value.

Notes to the Financial Statements (continued)**2. Significant accounting policies (continued)****Cash and cash equivalents (continued)**

Cash equivalents are held for meeting short-term liquidity requirements, rather than for investment purposes. Cash and cash equivalents are held at major financial institutions and are subject to counterparty risk as described in note 7.

Foreign currency

Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. Dollar amounts at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. Dollar amounts on the respective dates of such transactions. The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Options purchased

When an option is purchased, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current market value of the option purchased. Premiums paid for the purchase of options which expire unexercised are treated by the Fund on the expiration date as realized losses. If a purchased call option is exercised, the premium increases the cost basis of the security or foreign currency purchased by the Fund.

Options sold

When an option is sold, an amount equal to the premium received is recorded as an investment and is subsequently adjusted to the current market value of the option sold. Premiums received for the sale of options which expire unexercised are treated by the Fund on the expiration date as realized gains. If a sold call option is exercised, the premium received increases the Fund's effective sales price of the security or foreign currency sold.

Short-term deposits

Short-term deposits are stated at amortized cost, plus accrued interest which approximates fair value.

Forward currency contracts

The unrealized gain or loss on open forward currency contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realized gains or losses include amounts on contracts which have been settled or offset by other contracts with the same counterparty.

The unrealized gains and losses as a result of marking these contracts to market at June 30, 2017 are included in the Statement of Assets and Liabilities. The change in market value of forward exchange contracts is included in the Statement of Operations.

Futures contracts

Initial margin deposits are made upon entering into futures contracts and are generally made in cash. During the period the futures contract is open, changes in the value of the contract are recognized as unrealized gains or losses by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading.

Unrealized gains and losses are disclosed on the Statement of Assets and Liabilities. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract.

ACL Alternative Fund

A segregated account of ACL Alternative Fund SAC Limited

June 30, 2017

Notes to the Financial Statements (continued)

2. Significant accounting policies (continued)

Brokerage commissions

Brokerage commissions, including other trading expenses, are charged to realized and unrealized gains and losses as they are incurred to open a position, and an amount accrued for the close out of the position.

Redemptions payable

In accordance with FASB ASC Subtopic 480-10, Distinguishing Liabilities from Equity, a request for a redemption of shares by an investor is considered a mandatory redeemable financial instrument and shall be classified as a liability. Accordingly, requests for redemptions amounting to \$7,957,800 were effective for July 3, 2017 have been reclassified to redemptions payable on the Statement of Assets and Liabilities. Further redemption amounts dealt in June 2017 totaling \$2,937,788 remained payable to investors at year end.

3. Fair value measurements

The Fund's financial assets and liabilities carried at fair value have been classified for disclosure purposes, based on a hierarchy defined by FASB ASC 820, Fair Value Measurement.

The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3).

The three levels of the fair value hierarchy under ASC 820 are described below:

- Level 1—Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2—Valuations based on inputs, other than quoted prices included in Level 1, that are observable either directly or indirectly.
- Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement

As required by ASC 820, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The table below and overleaf shows information about the Fund's assets and liabilities measured at fair value as of June 30, 2017. All values shown are stated in USD.

				Balance as at June 30, 2017 Total
Assets	Level 1	Level 2	Level 3	
Investments in short term deposits	1,454,752,497	-	-	1,454,752,497
Investments in derivative contracts	108,455,824	-	-	108,455,824
Investments in foreign exchange contracts	-	73,394,295	-	73,394,295
Total Assets	1,563,208,321	73,394,295	-	1,636,602,616

ACL Alternative Fund

A segregated account of ACL Alternative Fund SAC Limited

June 30, 2017

Notes to the Financial Statements (continued)

3. Fair value measurements (continued)

				Balance as at June 30, 2017 Total
Liabilities	Level 1	Level 2	Level 3	
Investments in derivative contracts	(162,570,068)	-	-	(162,570,068)
Investments in foreign exchange contracts	-	(66,984,739)	-	(66,984,739)
Total Liabilities	(162,570,068)	(66,984,739)	-	(229,554,807)
Total	1,400,638,253	6,409,556	-	1,407,047,809

There were no significant transfers between any of the levels of the fair value hierarchy during the period ended June 30, 2017. In addition there were no Level 3 Assets or Liabilities held by the Fund as at June 30, 2017 or at any time during the period then ended.

4. Fees and expenses

There are no class specific expenses except where in the interests of seeking the optimal protection of a shareholder's investment, the Fund may engage in foreign exchange hedging transactions for the Euro Hedged Share Class A, the Euro Hedged Share Class B, the Euro Hedged Share Class C, the GBP Hedged Share Class A, the GBP Hedged Share Class B, the GBP Hedged Share Class C, the CHF Hedged Share Class A, the CHF Hedged Share Class B, the CHF Hedged Share Class C, the JPY Hedged Share Class B or the JPY Hedged Share Class D (where profits, gains and losses, costs, income and expenditure consequent upon such hedging transactions are allocated to that class).

Management and incentive fees

The Fund does not pay management or incentive fees directly to the Investment Manager. Management Fees are calculated at the Fund level and then distributed to and paid by each Trading Fund based on the Fund holdings in the Trading Funds at month end.

The Management Fees paid to the Investment Manager are charged at the following annual rates based on the Net Asset Value of the Fund on each Dealing Day of each month, payable monthly in arrears at a rate of 0.75% ("A" Sub Classes), 1.00% ("B" Sub Classes), 2.00% ("C" Sub Classes), 1.50% ("D" Sub Classes) and 1.75% ("E" Sub Classes) per annum of the Net Asset Value of the Fund.

The Investment Manager is also entitled to an incentive fee for each calendar quarter equal to 7.5% ("A" Sub Classes), 10% ("B" Sub Classes), 10% ("C" Sub Classes), 10% ("D" Sub Classes) and 10% ("E" Sub Classes) of the Net New Investment Profit (as defined below) for the quarter. "Net New Investment Profit" means, the increase in the Fund's Net Asset Value of the applicable share class outstanding in respect of each calendar quarter, prior to the deduction of the Investment Manager's incentive fee, and subject to a high water mark.

Notes to the Financial Statements (continued)**4. Fees and expenses (continued)****Investment manager and trading advisor equalization**

The incentive fee will be accrued and taken into account in the calculation of the Net Asset Value per Share on each Valuation Day. The incentive fee calculation in respect of the Fund is computed by operating an equalization accounting system so that each Share is charged an incentive fee that is based upon that Share's performance. This structure is intended to reduce the impact on existing Shareholders of incentive fees attributable to capital contributed or withdrawn during a performance period, and allows that all Shares within the same Share class have the same Net Asset Value per Share.

Where an investor subscribes for Shares at a time when the Net Asset Value per Share is less than the high water mark then an adjustment is required to reduce inequalities that may otherwise result to the respective subscriber, to the other Shareholders of the Fund, or to the Investment Manager or Trading Advisor. The high water mark is the greater of (i) the highest Net Asset Value per Share on the last day of any calendar quarter and (ii) the initial issue price for the Shares, both adjusted to take into account any distributions made in the interim.

Where Shares are subscribed at a time when the Net Asset Value per Share is less than the high water mark, no incentive fee will be accrued for existing Shareholders until the high water mark has been recovered. New Shareholders will however, in effect, be required to pay an incentive fee with respect to any subsequent appreciation in the Net Asset Value per Share of those Shares until the high water mark has been achieved (the "Depreciation Deposit"). The Depreciation Deposit is payable if the Net Asset Value per Share increases up to the high water mark. The Depreciation Deposit is recorded on the Statement of Assets and Liabilities as a liability. This liability is reduced when the related incentive fee is paid to the Investment Manager and Trading Advisors.

During the period ended June 30, 2017, amounts of \$230,219 were crystallized from the Depreciation Deposit account. As at June 30, 2017, the total amount of depreciation deposits payable to investors amounted to \$31,861,036.

Where Shares ("Premium Shares") are purchased at a time when the Net Asset Value per Share is greater than the high water mark, the prospective investor is required to pay an additional sum equal to the accrual then in place per Share in respect of the incentive fee (an "equalization credit"). The equalization credit is designed to ensure that all Shareholders have the same amount of capital at risk per Share.

The equalization credit may be returned to the investor in the form of shares providing the Net Asset Value per share remains above the high watermark at the end of a subsequent performance quarter.

To the extent that the Net Asset Value per share declines below the offer price, so the proportionate reduction in the equalization credit is returned to the investor. The equalization credit is recorded on the Statement of Assets and Liabilities as a liability. This liability is reduced when shares are returned to the investor. As at June 30, 2017 the equalization credits payable to investors amounted to \$15,589.

The Trading Funds will pay to the external Trading Advisors of the Company's other Segregated Accounts/Trading Funds an annual management fee based on the Trading Fund equity before management fees and incentive fees payable monthly in arrears.

Notes to the Financial Statements (continued)**4. Fees and expenses (continued)****Investment manager and trading advisor equalization (continued)**

The Company may increase/decrease the amount of Trading Funds and allocations thereto at its discretion and without Shareholder approval. Fees will range among the Trading Advisors from a minimum of 0% to a maximum of 2% per annum of each Trading Advisor's allocated assets.

The Trading Funds will also pay to the Trading Advisors an incentive fee for each calendar month or quarter. Incentive Fees will range from 0% to a maximum of 25% of Net New Trading Advisor Profit (as defined below) for the quarter (the "Incentive Fee"). "Net New Trading Advisor Profit" means, with respect to any calendar month or quarter, any net profits (or losses) realized on all transactions closed out in the Trading Fund during the month or quarter (after deduction of brokerage commissions, exchange fees, NFA fees and give-up fees), but prior to the deduction of any fees charged by the Investment Manager, Administrator or Depositary for services to the Fund, plus:

(A) the change in net unrealized profits (or losses) on open positions in the Trading Fund as of the end of the quarter or preceding relevant calendar month versus the amount of such unrealized profits (or losses) on open positions in the Trading Fund as of the end of the preceding quarter or preceding relevant calendar month, minus

(B) the Management Fees for the calendar quarter or relevant calendar month (but not including any Incentive Fee) and minus

(C) any cumulative net realized and unrealized trading losses (including expenses) incurred in the Trading Fund since the last preceding calendar quarter or last preceding calendar month for which an Incentive Fee was payable. Trading Advisor management and incentive fees are not paid at the Fund level but by the individual Trading Funds.

Administration, registrar fees and transfer agency fees

The Company shall pay the Registrar and Transfer Agent, and Administrator, in respect of the Fund, fees calculated based on the Fund's pro rata share of the Investment Manager's total assets under administration with the Administrator on each Valuation Day (excluding feeder funds). The fees payable by each Trading Fund to the Administrator, Registrar & Transfer Agent for services provided are calculated as 14bp p.a. of the Net Asset Value, calculated on each Valuation Day, up to USD250 million, 12bp p.a. on the next USD250 million, 10bp p.a. on the next USD500 million, 8bp p.a. on the next USD500 million, 6bp p.a. on the next USD1.5 billion and 4bp p.a. thereafter. In addition, BNP Paribas Bank & Trust Cayman Limited receives \$12,500 per month in relation to administration, registrar & transfer agency services.

These fees will accrue daily and will be paid monthly in arrears, by the Trading Funds. All of the fees specified in the foregoing paragraph above for administration, registrar and transfer agency services will be paid in aggregate by each Trading Fund from the account it maintains. The Fund will then be responsible for paying the individual fees due to the Administrator, and the Registrar and Transfer Agent.

Notes to the Financial Statements (continued)**4. Fees and expenses (continued)****Depository fees**

In accordance with the obligations under the Alternative Investment Fund Managers Directive, ("AIFMD"), the Investment Manager and the Directors of the Fund have appointed BNP Paribas Securities Services, Dublin branch ("Depository") as Depository. The Depository is responsible for overseeing the calculation of the value of the Shares of the Fund and ensuring that the value of the Shares of the Fund is calculated in accordance with the Fund's Placement Memorandum, the Company's Bye Laws, and Article 19 of AIFMD and is responsible for reporting any breach to the Central Bank of Ireland.

The fees payable by each Trading Fund to the Depository in relation to Depository services provided to the fund will be calculated as 1.75 bp p.a. of the Net Asset Value of the Fund, up to USD5.5 billion and 1.5 bp p.a. thereafter. These fees will accrue daily and will be paid monthly in arrears, by the Trading Funds. Depository fees for the period were \$204,000. As at 30 June 2017, the total Depository fees payable were \$38,991.

Director's fees

The Trading Funds shall pay the Directors such annual remuneration for acting as Directors of the Company as the Directors may from time to time agree, provided however that the annual remuneration of the Directors shall not, in the aggregate, exceed \$20,000. Mr. Carney does not receive any Directors' fee. Such fees shall be paid in advance.

Fees payable

Fees payable by the Trading Funds as at June 30, 2017 were:

	US\$
Investment Manager management fees	1,588,926
Trading Advisor management fees	1,233,628
Brokerage commissions and other fees	349,926
Audit & Tax fees	158,581
Administration fees	165,577
Depository fees	38,991
Other professional fees	12,801
Total	<u>3,548,430</u>

5. Taxation

At the present time, no income, profit or capital gains taxes are levied in Bermuda and, accordingly, no provision for such taxes has been recorded by the Fund. The Fund has received from the Minister of Finance of Bermuda under the Exempted Undertakings Tax Protection Act 1966 an assurance that, in the event of there being enacted in Bermuda any legislation imposing tax computed on profits or income, or computed on any capital assets, gain or appreciation or any tax in the nature of estate duty or inheritance tax, the Company shall be exempt from all such taxes until March 31, 2035.

As an exempted mutual fund Company, the Fund is liable to pay in Bermuda an annual government registration fee, at a current rate of \$5,190 per annum, based upon the Fund's authorized share capital.

Notes to the Financial Statements (continued)**6. Share Capital**

Shares	Authorized and issued: 100 Founder Shares of US\$0.01 each, having been issued for the purposes of incorporation. Authorized and unissued: 100,000,000 redeemable shares of US\$0.001 par value, which are available for issue in classes, each with a designated currency of issue. Five Share Classes were authorized as at June 30, 2017 each of which is subdivided into a number of Sub-classes namely: a USD Share Class A, a USD Share Class B, a USD Share Class C, a USD Share Class D, a USD Share Class E, a Euro Hedged Share Class A, a Euro Hedged Share Class B, a Euro Hedged Share Class C, a Euro Hedged Share Class D, a GBP Hedged Share Class A, a GBP Hedged Share Class B, a GBP Hedged Share Class C, a GBP Hedged Share Class D, a JPY Hedged Share Class A, a JPY Hedged Share Class B, a JPY Hedged Share Class C, a JPY Hedged Share Class D, a CHF Hedged Share Class A, a CHF Hedged Share Class B, a CHF Hedged Share Class C and a CHF Hedged Share Class D. As at June 30, 2017, shares have been issued in sixteen sub classes, namely the USD Share Class A, USD Share Class B, USD Share Class C, USD Share Class D, USD Share Class E, Euro Hedged Share Class A, Euro Hedged Share Class B, Euro Hedged Share Class C, GBP Hedged Share Class A, GBP Hedged Share Class B, GBP Hedged Share Class C, CHF Hedged Share Class A, CHF Hedged Share Class B, CHF Hedged Share Class C, JPY Hedged Share Class B and the JPY Hedged Share Class D.
--------	---

Each Share is entitled to a vote.

Redeemable shares are offered on each business day. Applications are subject to a sales charge of up to 3% (payable to the Fund and/or its placement agents). Fractional shares may be issued.

Applications and redemptions received by 5.00 pm Irish time (12.00 pm EST or 6.00 pm CET) are processed the following business day. The right to redeem will be temporarily suspended during any period when the calculation of the Net Asset Value is suspended.

Income, expenses, realized and unrealized gains are allocated between Classes based on their relative net assets (with the exception of Class specific income and expenses, in particular the gains or losses arising on the Euro Hedged Share Class A, Euro Hedged Share Class B, Euro Hedged Share Class C, GBP Hedged Share Class A, GBP Hedged Share Class B, GBP Hedged Share Class C, CHF Hedged Share Class A, CHF Hedged Share Class B, CHF Hedged Share Class C, JPY Hedged Share Class B and the JPY Hedged Share Class D currency hedging transactions).

Notes to the Financial Statements (continued)**7. Financial instruments**

Asset allocation is determined by the Investment Manager who manages the distribution of assets to achieve the investment objectives. Divergence from target asset allocations and the composition of the portfolio is monitored by the Investment Manager. In instances where the portfolio has diverged from target asset allocations, the Investment Manager will rebalance to fall in line with the target asset allocations. The Investment Manager has developed a tiered investment risk management system incorporating both quantitative and qualitative risk measures to monitor and control the Fund's exposure and whether the Fund's investments are consistent with the Fund's investment objectives, policies and limits as set out in the Fund's constitutional documents and placement memorandum. This is achieved through the collation of information from the Administrator and brokers on all trading, cash movements and subscriptions/redemptions, along with the risk limits and flags created by the Investment Manager's investment committee (the "Investment Committee"), into the Investment Manager's proprietary risk system.

The risk systems produce the required information to enable the Investment Committee to manage risk exposures, make timely and informed decisions, and enable the Risk Management Unit to monitor the performance of the Fund. A range of daily reports are produced and these are monitored on a daily basis.

The Red Flag system is a tiered warning system in which colour coded flags are raised when a variety of metrics (described below) move within 75%, 90%, or 100% of previous highs/lows or pre-set levels.

Margin & FX Exposure limits are monitored daily and the general rule is that the relationship with a Trading Advisor would be terminated immediately if these limits were breached. Margin & FX Exposure Limits for each Trading Advisor are outlined in the relevant Trading Advisory Agreement for each Trading Advisor. This system is monitored on a daily basis and the Investment Committee are immediately notified by the Risk Management unit if any of the limits outlined in the Fund's constitutional and offering documents are breached, or other limits are breached.

Drawdown (a reduction in value relative to the previous highest valuation) is monitored daily and a relationship with a Trading Advisor would be immediately terminated if their Risk-Adjusted Drawdown Limit was breached.

Volatility for the Fund and for each Trading Advisor is monitored daily. Each Trading Advisor is assigned a target volatility by the Investment Committee. All changes in Trading Advisors' target volatility are at the discretion of the Investment Committee and can be based on both quantitative and qualitative analysis.

The Fund allocated in excess of 75% of its assets currently to 22 Trading Funds in the period January 1, 2017 to June 30, 2017. The main risks arising from the Trading Fund's financial instruments are as follows:

Market risk

Market risk represents the potential loss that can be caused by a change in the market value of the financial instruments. The Trading Funds' exposure to market risk is determined by a number of factors including interest rates, foreign currency exchange and market volatility. Investments may be made in markets located in countries which are exposed to the risks of political change or years of political uncertainty which could adversely affect the market value.

ACL Alternative Fund

A segregated account of ACL Alternative Fund SAC Limited

June 30, 2017

Notes to the Financial Statements (continued)

7. Financial instruments (continued)

Counterparty risk

There is a risk that counterparties may not perform their obligations and that settlement of transactions may not occur. The U.S. Commodity Exchange Act, as amended (the "CEA"), requires a clearing broker to segregate all funds received from such broker's customers in respect of futures (but not forwards) transactions from such broker's proprietary funds. If any of the Trading Fund's commodity brokers were not to do so to the full extent required by law, or in the event of a substantial default by one or more of such broker's other customers, the assets of the Trading Fund might not be fully protected in the event of the bankruptcy of such broker. Furthermore, in the event of such a bankruptcy, the Trading Funds would be limited to recovering only a pro rata share of all available funds segregated on behalf of the affected commodity broker's combined customer accounts, even though certain property specifically traceable to the Trading Funds (for example, United States Treasury bills or cash deposited by the Trading Funds with such broker) was held by such broker. Commodity broker bankruptcies have occurred in which customers were not able to recover from the broker's estate the full amount of their funds on deposit with such broker and owing to them. The below table shows the short term credit rating of the Fund's counterparties as at June 30, 2017:

Counterparty	S&P	Moody	Fitch
Deposit Banks			
Bank of Tokyo - Mitsubishi UFJ Ltd	A-1	P-1	NA

ACL Alternative Fund

A segregated account of ACL Alternative Fund SAC Limited

June 30, 2017

Notes to the Financial Statements (continued)

7. Financial instruments (continued)

Counterparty risk (continued)

As at June 30, 2017, cash required to be held as margin with the brokers amounted to US\$514,318,838. The remaining cash held with the brokers is excess margin. Commodity broker bankruptcies are not insured by any governmental agency, and investors would not have the benefit of any protection such as that afforded customers of bankrupt securities broker-dealers by the U.S. Securities Investors Protection Corporation. In respect of its forward trading, the Trading Funds will be subject to the risk of the inability or refusal to perform with respect to such contracts on the part of the principals or agents with or through which the Trading Funds trade. Any failure or refusal to discharge their contractual obligations by the counterparties with which the Trading Funds deal on the forward markets, whether due to insolvency, bankruptcy or other causes, could subject the Fund to substantial losses.

The Trading Funds will not be excused from performance under any forward contracts into which it has entered due to defaults under other forward contracts which in the Investment Manager's strategy were to have substantially "covered" the former. The Trading Funds deal in the forward markets only with major financial institution counterparties which the Investment Manager considers to be creditworthy. However, defaults have occurred in the forward markets, and the risk of such defaults cannot be eliminated from the Trading Funds' trading markets, whether due to insolvency, bankruptcy or other causes, could subject the Fund to substantial losses. The Company, on behalf of the Trading Funds, enters into forward contracts with counterparties. Forward contracts are traded in unregulated markets between principals, and consequently the Trading Funds assume a credit risk on these contracts.

Off balance sheet risk/derivative risk

An off balance sheet market risk exists when the maximum potential loss on a particular investment is greater than the value of such investment, as reflected on the Trading Funds' Statement of Assets and Liabilities. Off balance sheet risk exists, among other situations, when the collateral received by the Trading Funds from counterparties to an agreement with the Company on behalf of the Trading Funds proves to be insufficient to cover the Trading Funds' losses resulting from default by the counterparties of its obligation to perform under the agreement. Futures contracts and forward contracts expose the Trading Funds to a market risk equal to the value of the contracts purchased.

As at June 30, 2017, the volume of the Fund's derivative activities based on their notional amounts and number of contracts are as follows:

Primary risk	underlying	Long exposure		Short exposure	
		Notional amount US\$'000	No. of contracts	Notional amount US\$'000	No. of contracts
Foreign Exchange Price					
	Forward contracts	2,171,980	253	1,261,836	253
	Futures contracts	1,104,561	12,268	600,250	5,571
	Option contracts*	-	1,192	-	-
Commodity price					
	Futures contracts	1,487,321	28,155	2,368,664	62,302

ACL Alternative Fund

Notes to the Financial Statements (continued)**7. Financial instruments (continued)****Leverage**

The Fund enters into derivative contracts on the basis of initial margin deposits or premiums which are equal to a small percentage of the full market value of those contracts. Therefore, the notional values of the contracts traded by the Fund significantly exceed the margin or premium paid for those contracts by the Fund and, as a result of investing in such margin-traded instruments, leverage is inherent to the Fund's investment strategy.

Under AIFMD, the Investment Manager is required to express the level which the Fund's leverage will not exceed, as a ratio between the Fund's total exposure and its Net Asset Value. AIFMD prescribes two methodologies for calculating overall exposure of a fund: the "gross methodology" and the "commitment methodology". These methodologies are briefly summarised below but are set out in full detail in AIFMD.

The commitment methodology takes account of the hedging and netting arrangements employed by a fund at any given time (purchased and sold derivative positions will be netted where both relate strictly to the same underlying asset). By contrast, the gross methodology does not take account of the netting or hedging arrangements employed by a fund.

Based on the methodologies for calculating global exposure outlined above, the Fund's maximum expected level of leverage is 250 times the Net Asset Value of the Fund using the Gross method. The Fund's maximum expected level of leverage is 150 times the Net Asset Value of the Fund using the Commitment method.

The diversification and risk adjustment of the components within the Fund are designed to create a diversified balance of risk within the portfolio across a number of dimensions. One of those dimensions is market sector – equities, long-term interest rates, short-term interest rates, foreign exchange and commodities. The balance of risk is managed by reference to volatility measurements and the relationship of volatility to leverage on a Gross or Commitment basis is a complex one.

For instance, one of the market sectors is short term interest rate futures. These have short duration, typically 3 months, which makes them significantly less sensitive to interest rate changes than longer term interest futures, ranging from 2 years to in excess of 30 years. In order to ensure that the Investment Strategy remains diversified and balanced, and that the short term interest rate positions have the possibility of making a meaningful contribution to performance, the notional amounts of the short term interest rate futures will be significantly larger on average, both relative to the notionals of any longer term interest rate positions, and in absolute terms. Therefore, the high leverage of the Fund on a Gross and Commitment basis is a function of the use of short term interest rate futures within the portfolio.

The Investment Strategy's approach is to construct the Fund's portfolio in a diversified manner. The Investment Manager assesses exposure within the Fund by using a variety of measures including margin-to-equity. The Fund has a maximum margin-to-equity limit of 40%.

The risk utilisation in the programme changes dynamically over time depending on what positions are taken by the Trading Advisors. The Investment Strategy adopts the principle of risk spreading through diversification because holding positions in a wide-range of markets reduces concentration risk and has been shown, over time, to decrease portfolio volatility versus a single contract strategy.

Notes to the Financial Statements (continued)**7. Financial instruments (continued)****Operational risk**

Pursuant to the Investment Manager's Risk Management Policy, risks throughout the Investment Manager are identified, measured, assessed and monitored in the Risk Register. This system identifies factors that could cause risk, including operational risk, measures to reduce risk and any required solutions. It is reviewed on an ongoing basis by the respective business units and the Risk Management Unit. Reviews are completed by staff in consultation with the Risk Management Unit. The Risk Register is reviewed and approved annually by the Board of Directors of the Investment Manager.

Futures and options risk

The Investment Manager may engage in various portfolio strategies on behalf of the Trading Funds through the use of futures and options. Due to the nature of futures, cash to meet margin monies will be held by a broker in an omnibus client account segregated from the brokers' own property, with whom the Trading Funds have an open position. The Fund may grant a security interest to a broker over any cash placed with that broker in order to secure its obligations to the broker. The Fund may transfer ownership of the cash to the broker where the broker is required to transfer ownership of the cash to other third parties, such as banks, brokers exchanges or central clearing parties, in order to comply with client money rules or to effect a transaction for the Fund. Where ownership of the cash is passed by the broker to a third party, the Fund will have no proprietary right to the cash and in the event of insolvency of that third party, the broker would only have an unsecured claim on the Fund's behalf to an amount equal to the value of the cash placed with that third party. In these circumstances the Fund is exposed to the risk that any amount received by the broker will not be sufficient to satisfy the Fund's claim. Whether ownership of the cash has been transferred or whether cash is held in an omnibus client account, in the event of insolvency or bankruptcy of the futures exchange, or large losses sustained in the broker's segregated accounts, there can be no guarantee that such monies will be returned to the Trading Funds. On execution of an option a Trading Fund may pay a premium to a counterparty.

In the event of the insolvency or bankruptcy of the counterparty, the option premium may be lost in addition to any unrealized gains where the contract is in the money. The risks inherent in the use of the above instruments include adverse changes in the value of such instruments, imperfect correlation between the price of the instruments and movements in the price of the underlying security, index or futures contract and the possible absence of a liquid secondary market for any particular instrument at any time.

Liquidity and valuation of investments

In order to ensure that cash is available for the Fund to meet redemption requests, the Investment Manager has established and maintains risk management policies and systems which are designed to ensure that (i) the Fund maintains a level of liquidity appropriate to its underlying obligations; (ii) the Investment Manager monitors the liquidity profile of the Fund's portfolio of assets; (iii) the Investment Manager implements and maintains appropriate liquidity management systems, to assess the quantitative and qualitative risks of positions and of intended investments; (iv) the Investment Manager conducts periodic stress tests, under both normal and exceptional liquidity conditions, to assess and monitor the liquidity risk of the Fund.

Notes to the Financial Statements (continued)**7. Financial instruments (continued)****Liquidity and valuation of investments (continued)**

Therefore, the Investment Manager's risk management policies and systems are designed to ensure that the liquidity risk of the Fund is monitored and managed and that the liquidity profile of the investments of the Fund complies with the Fund's liquidity obligations.

The Trading Funds may invest in securities or derivatives which are unlisted or for which there is no active market. For example, a Trading Fund may invest in derivatives with direct or indirect exposure to emerging markets and such investments may be subject to increased political risk or adverse currency movements compared to securities traded in more developed markets. In addition, a Trading Fund may acquire investments which are only traded over-the-counter. Accurately valuing and realizing such investments, or closing out positions in such investments at appropriate prices, may not always be possible.

Foreign currency risk

The Net Asset Value per Share will be computed in the Functional Currency, whereas the investments of Trading Funds, to which the Fund allocates its assets, may be acquired in a wide range of currencies, some of which may be affected by currency movements of a more volatile nature than those of developed countries and some of which may not be freely convertible.

It may not be possible or practicable to hedge against the consequent currency risk exposure and in certain instances the Investment Manager may consider it desirable not to hedge against such risk. The Investment Manager may enter into cross currency hedging transactions. As at June 30, 2017 US\$17,720,002 of cash was held in foreign currency with the Depositary / Broker.

ASC 815-10, "*Disclosures about Derivative Instruments and Hedging Activities*" amends and expands the disclosure requirements of ASC 815 with the intent to provide users of financial statements with an enhanced understanding of how and why an entity uses derivative instruments. The fair value of open derivative instruments held by the Fund as at June 30, 2017 is disclosed on the face of the Statement of Assets and Liabilities.

As noted in Note 4, the Fund may enter into foreign exchange hedging transactions in the EURO, GBP, CHF and JPY Hedged Share Classes. As a result, the Fund has recognized realized and unrealized gains/losses on foreign exchange derivatives (comprising futures and forward foreign exchange contracts) during the year. The total realized gain on foreign exchange derivatives amounted to \$18,141,169 and is included in the Statement of Operations within the balance "Net realized loss on investments in derivative contracts and foreign currency". The total change in unrealized gain on foreign exchange derivatives amounting to \$4,422,602 is included in the Statement of Operations within the balance "Net change in unrealized loss on investments in derivative contracts and foreign currency". These amounts contribute to off-setting the gains and losses arising on the conversion of ACL Alternative Fund net assets to local currency for the EURO, GBP, CHF and JPY Hedged Share Classes.

ACL Alternative Fund

June 30, 2017

Notes to the Financial Statements (continued)

7. Financial instruments (continued)

Foreign currency risk (continued)

As at June 30, 2017, the Fund had the following open futures positions for share class hedging purposes:

	No. of contracts	Contract size	Notional Value	Unrealized gain / (loss) in US\$
GBP FX Future Mar 17	2,470	62,500	201,382,188	3,365,375
EURO FX Future Mar 17	1,070	125,000	153,371,125	2,969,000
JPY FX Future Mar 17	316	12,500,000	35,194,500	(620,150)
CHF FX Future Mar 17	83	125,000	10,870,925	148,363
Net unrealized gain				5,862,588

8. Offsetting assets and liabilities

The Fund is required to disclose the impact of offsetting assets and liabilities represented in the Statement of Assets and Liabilities to enable users of the financial statements to evaluate the effect or potential effect of netting arrangements on its financial position for recognized assets and liabilities. These recognized assets and liabilities are financial instruments and derivative instruments that are either subject to an enforceable master netting arrangement or similar agreement or meet the following right of setoff criteria: the amounts owed by the Fund to another party are determinable, the Fund has the right to set off the amounts owed with the amounts owed by the other party, the Fund intends to set off, and the Fund's right of setoff is enforceable at law.

As of June 30, 2017, the Fund holds financial instruments and derivative instruments that are eligible for offset in the Statement of Assets and Liabilities and Statement of Operations and are subject to a master netting arrangement. The master netting arrangement allows the counterparty to net any collateral held on behalf of the Fund or liabilities or payment obligations of the counterparty against any liabilities or payment obligations of the Fund to the counterparty.

The following table provides disclosure regarding the potential effect of offsetting of recognized assets presented in the Statement of Assets and Liabilities:

	Gross Amount of Recognized Assets	Gross Offset in the Statement of Assets and Liabilities	Net Amounts of Recognized Assets Presented in the Statement of Assets and Liabilities
	US\$	US\$	US\$
Derivative and foreign exchange contracts	181,850,119	-	181,850,119

June 30, 2017

Notes to the Financial Statements (continued)

9. Gains and losses from financial instruments

The following table details the gains and losses from financial assets and liabilities:

	June 30, 2017 US\$
Realized gains on Investments in derivative contracts and foreign currency	810,025,336
Net change in unrealized gains on investments in derivatives and foreign currency	213,754,791
Total gains on realized and change in unrealized on investments in derivative contracts and foreign currency	1,023,780,127
	June 30, 2017 US\$
Realized losses on Investments in derivative contracts and foreign currency	(876,179,578)
Net change in unrealized losses on investments in derivatives and foreign currency	(330,699,663)
Total losses on realized and change in unrealized on investments in derivative contracts and foreign currency	(1,206,879,241)

Gains and losses presented above exclude interest income and interest expense.

10. Related party disclosures

The Director fees are not paid directly by the Fund, but are distributed and paid by each of the Trading Funds based on the Fund holdings at month end. All other related party transactions have been fully disclosed in the financial statements, including investments in affiliated funds. None of the Directors hold any investments in the Fund or Trading Funds.

11. Brokerage commissions

Brokerage commissions of US\$10,107,903 were paid by the Fund and the Trading Funds to which it allocates its assets for the period from January 1 to June 30, 2017. This amount was consolidated within the realized and unrealized gain or loss on investments in derivative contracts and foreign exchange.

12. Commitments and contingencies

In accordance with the FASB subtopic ASC 460-10, the Fund is required to disclose information about commitments and contingencies. In the normal course of business the Fund and Trading Funds of the Company enter into contracts that contain a variety of warranties and indemnifications. The Fund's and the Trading Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund and Trading Funds that have not yet occurred. However, based on experience, the Fund and the respective Trading Funds expect the risk of loss to be remote.

ACL Alternative Fund

A segregated account of ACL Alternative Fund SAC Limited

June 30, 2017

Notes to the Financial Statements (continued)

13. Accounting for uncertainty in income taxes

Accounting Standards Codification ("ASC") 740-10 "*Accounting for Uncertainty in Income Taxes – an interpretation of ASC 740*" clarifies the accounting for uncertainty in income taxes recognized in the Fund's financial statements in conformity with ASC 740 "*Accounting for Income Taxes*". ASC 740-10 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position or expected position to be taken on a tax return. Given the Company's domicile, the investment objective of the Fund and the trading strategies and instruments traded by the Trading Funds, the Directors of the Fund have determined there are no uncertain tax positions. In addition, neither the Company nor the Fund is subject to any tax examinations by the tax authorities in their country of domicile or taxing authorities in other jurisdictions.
